

Backlog Overview

[« Guide « Previous](#)

[Next »](#)

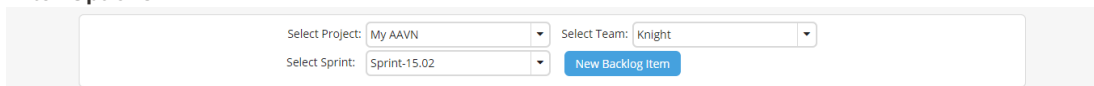

A. General information:

- Click on Backlog menu to go to Backlog page
- This page is used for moving user story (US) between Product Backlog and Sprint
- When an US is assigned to Sprint, this US will be called Issue

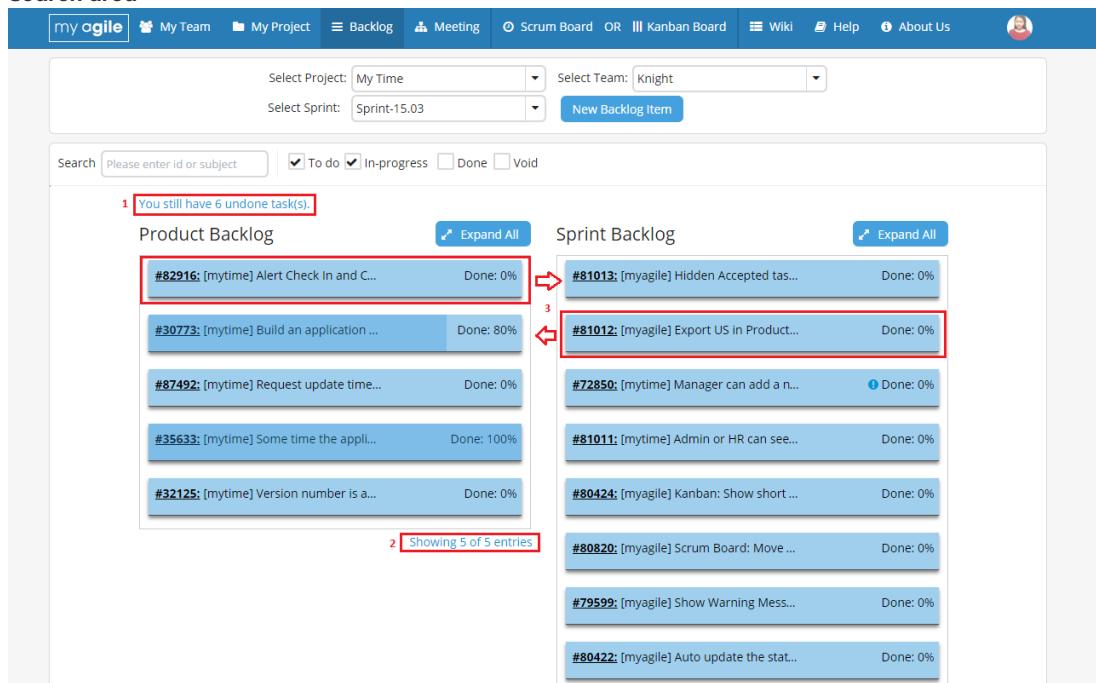

B. Detail information:

1. Filter Options:

- Choose the project, team and sprint that you will work with it.
- New Backlog Item: add new backlog item for Product Backlog.

2. Search area

- 1: Link to show undone tasks.
- 2: when there are more than 15 user stories, roll down the mouse to see more.
3. User can drag and drop to move US between Product backlog and Sprint Backlog.

***Note:** If the task is not done in one sprint, it will have gray color. And you can see the history of the task (When it begin? which sprint is it implemented?).

#72058: [myagile] Can not move a task... Done: 0%

#72058: [myagile] Can not move a task... Continuous in: Sprint-15.03
