

Meeting Overview

[« Guide « Previous](#)

[Next »](#)

If you use “Sprint Backlog” page as Planning Meeting 1 (What to do), the “Meeting” page will be used as Planning Meeting 2 (How to do). The main purpose of this page is used to support the team to divide an issue into some tasks and estimate the point for these tasks

#23944	[MyAAVN] Font is difference on Firefox, chrome, IE	-As a PO, I want to see font is same on browsers	D0T0		
Total Estimate Points: 6.0					

3. Resolve point conflict

[BACK TO TOP](#)

When you divide an issue to some tasks and estimate point for them will cause point conflict.]The warning icon is shown next to the point of parent issues..

The screenshot shows the 'my agile' Kanban Board interface. At the top, there are filters for 'Select Project: My AAVN', 'Select Team: Knight', and 'Select Sprint: Sprint-15.02'. Below these is a table with columns: #ID, Subject, Description, Estimate, Remove, and Add. The table contains several issues, including a parent issue #74601 and its children #75701, #75861, #75860, and #75895. The 'Estimate' column shows D0T0 for the parent and D5T1 for the children. A red box highlights a warning icon next to the parent's estimate, with a tooltip explaining the conflict: 'The estimate point of this task and total estimate points of its children are not equal. - Click here to update estimate point for parent issue. - Click here to update estimate point for children issues'. At the bottom, a teal bar shows 'Total Estimate Points: 12.0'.

#ID	Subject	Description	Estimate	Remove	Add
▼ #74601	[myAAVN] Change Logo to new and copyright	-As a PO I want to see the new logo on application and the current copyright.	D0T0 ⚠		
➕ #75701	change logo		D5T1		
#75861	export my team	export the information about team a	D0T0		
▼ #75860	who is on-line on system	I would like to see who is on-line in s	D0T0 ⚠		
➕ #75895	design	design layout	D5T1		
#23944	[MyAAVN] Font is difference on Firefox, chrome, IE	-As a PO, I want to see font is same on browsers	D0T0		

Total Estimate Points: 12.0

Two solution to solve this problem by system; they are updating point for parent or children issues.
Update the point for parent issue

This screenshot shows the same Kanban Board as before, but with a modal dialog box open. The dialog is titled 'Change Estimate point of Issue parent' and contains a warning icon and the text: '---The estimate point of "#75860" will change from D0T0 to D5T1'. At the bottom of the dialog are 'Yes' and 'No' buttons. The background table is dimmed.

Update the point for parent issue

This screenshot shows the Kanban Board after the update. The parent issue #75860 now has an estimate of D0T0 with a warning icon. Its child issue #75895 now has an estimate of D5T1. A red box highlights the 'Back' button at the bottom left of the interface.

#ID	Subject	Description	Estimate	Remove	Add
▼ #75860	who is on-line on system	I would like to see who is on-line in system	D0T0 ⚠		
➕ #75895	design	design layout	D5T1		D5T1

Total Estimate Points: 12.0
