

Statistics & Feedbacks Overview

[« Guide « Previous](#)

[Next »](#)

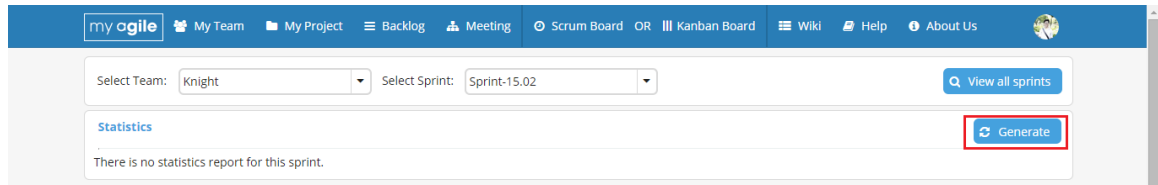

Choose "Statistics & Feedbacks" in menu to go to Statistics & Feedbacks page

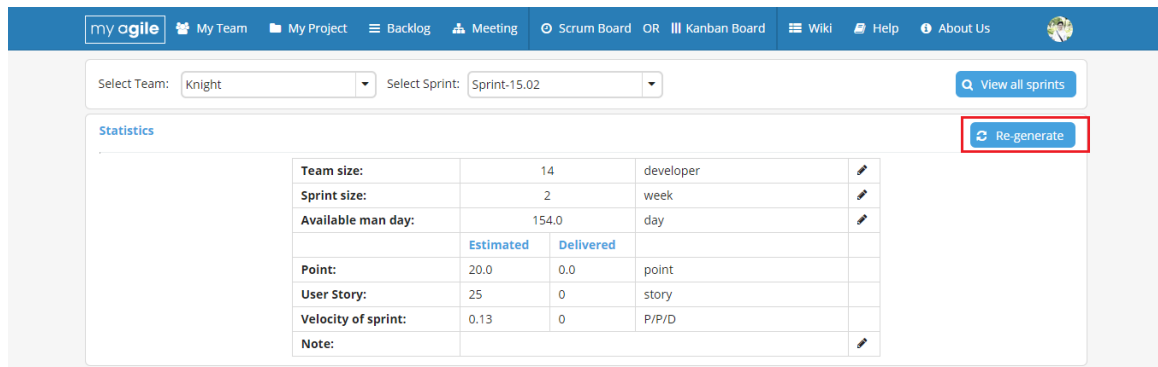

1. View statistics information in sprint

Choose the sprint you want to view statistics

And generate (if the sprint have no statistics)

or re-generate the statistics (if you want come back to default statistics)

This is a statistics of sprint

Team size:	14	developer	
Sprint size:	2	week	
Available man day:	154.0	day	
	Estimated	Delivered	
Point:	20.0	0.0	point
User Story:	25	0	story
Velocity of sprint:	0.13	0	P/P/D
Note:			

You have a lot of fields (automatically figure out by system) and you can also change red rectangle field (Team size, sprint size and available man day), green rectangle field (unit of field) and blue field (note for statistics)

- Team size : all of members in team
- Sprint size : total day of sprint (from start date to end date except Saturday and Sunday)
- Available man day : team size * sprint size
- Point : total point of all issues belong to sprint
- User story : all issues belong to sprint
- Velocity of sprint : total point / available man day
- Note : note for sprint

* We have two types : Estimated (planned by team) and Delivered (accepted by PO)

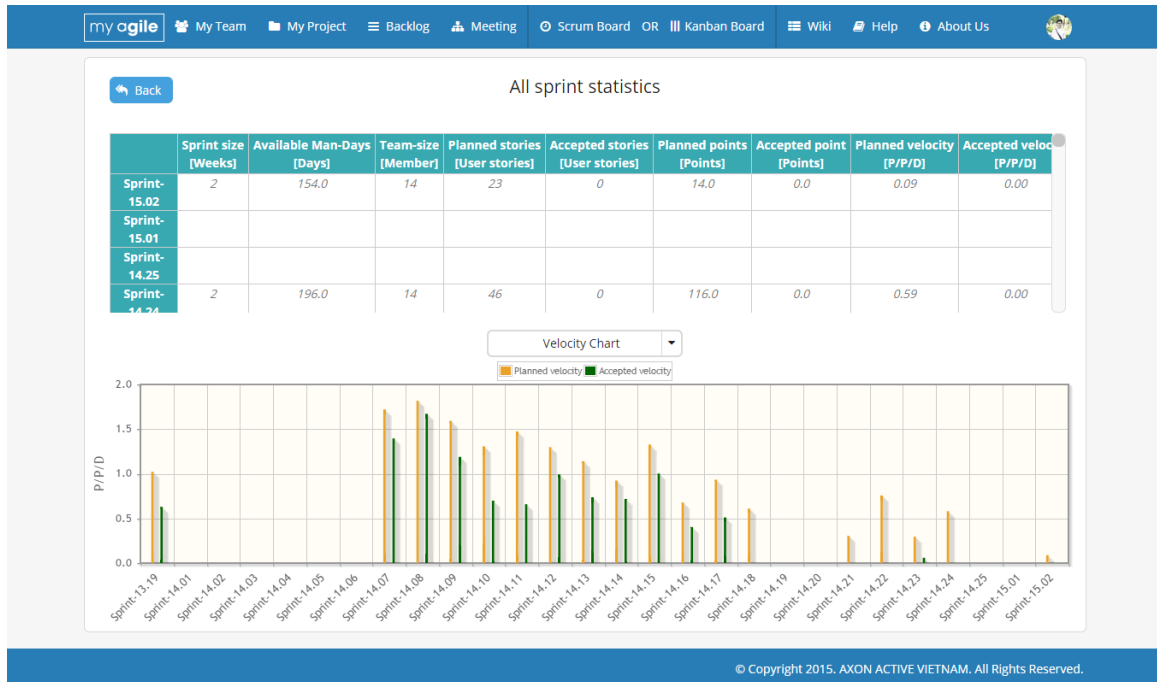

You can update field by click on field, and the textbox is shown later. Press "Enter" to accept this update content.

2. View statistics of all sprints

[BACK TO TOP](#)

Click "View all sprints" button to view it

In this page, you can not only see statistics table but also statistics chart of all sprint (we support three type of chart : Velocity Chart, Story Chart and Point Chart)
